

Project Background and Project Goal

- **BACKGROUND**

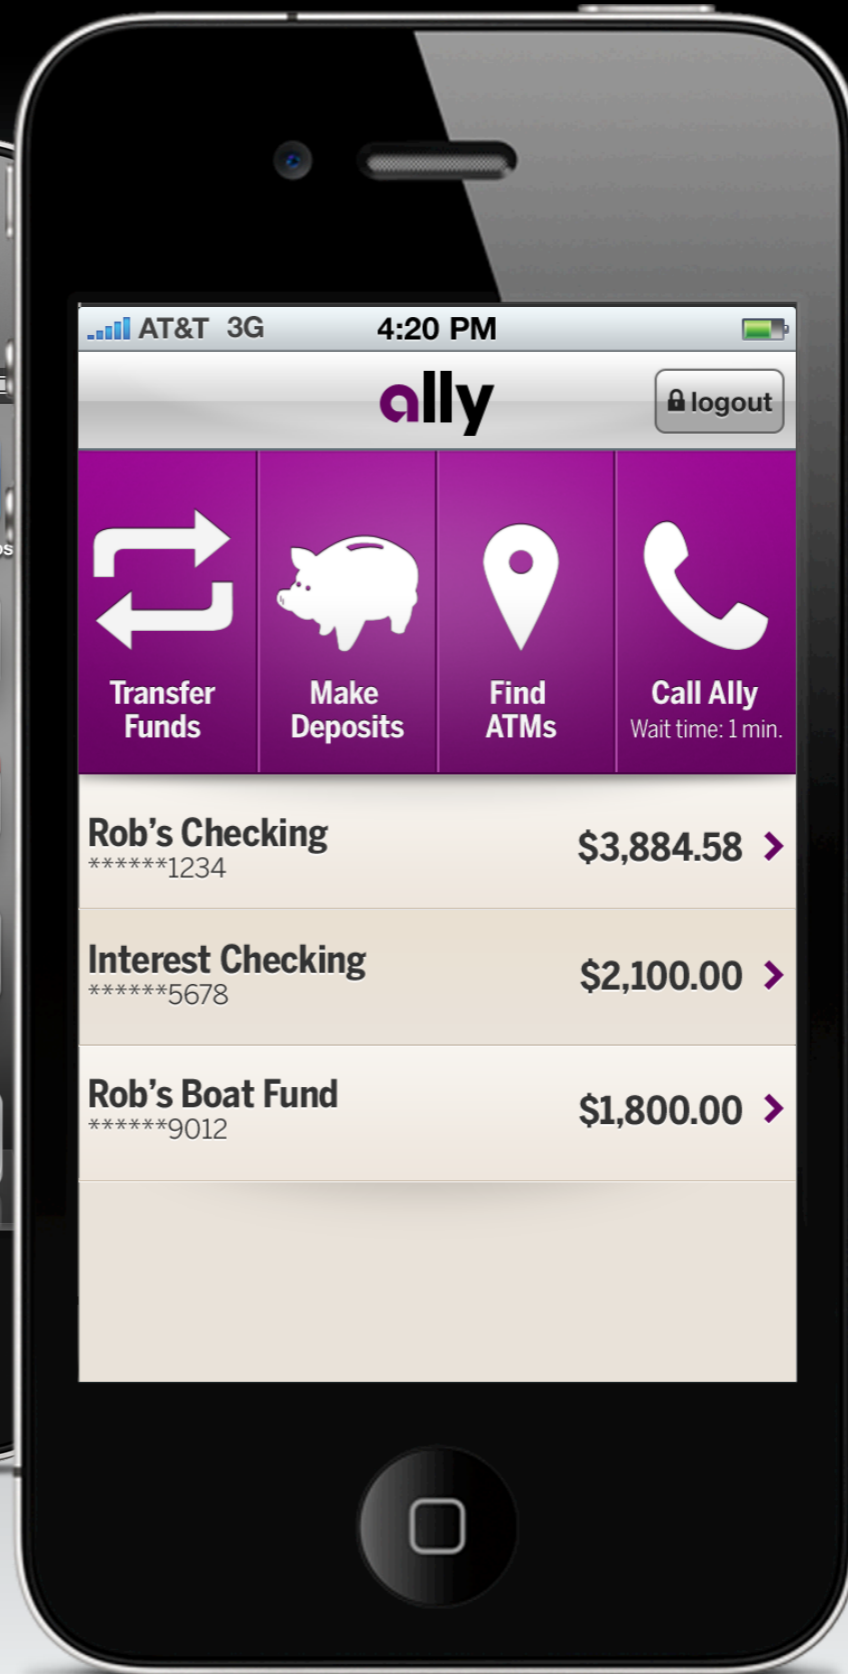

- Spun off from the Debit Rewards project as its own project with feasible functionality
- Ally's Interest Checking product offers withdrawals from any ATM and cash back at thousands of retail locations, yet there is no tool to help customers locate where to access their cash

- **PROJECT GOALS**

- Deliver a cash locator application to assist customers (and to-be customers) with finding places to access their cash
- Gain access to new marketing channels: Apple App Store and Android Market
- Deliver 4 versions of the tool:
 - Desktop browser optimized
 - Mobile browser optimized (to be linked with Mobile Banking)
 - iPhone and Android applications

- **METRICS**

- Primary: Tool usage volume
- Secondary: Favorable ratings in the Apple App Store and Android Market
- Also expected to positively impact the following metrics:
 - Improve customer satisfaction
 - Improve customer base growth
 - Improve deposit growth

PROJECT GOALS

Deliver a cash locator application to assist customers (and to-be customers) with finding places to access their cash

Gain access to new marketing channels: Apple App Store and Android Market

Deliver 4 versions of the tool:

- Desktop browser optimized

- Mobile browser optimized (to be linked with Mobile Banking)

- iPhone and Android applications

Key Features and Functionality

DESKTOP BROWSER AND CORE FUNCTIONS

- Modularly developed with APIs for repurposing and expansion of functionality [see appendix]
- Mapping of Surcharge Free / Fee ATMs
- Mapping of Retail location data
- Visual differentiation between location types
- Filtering by location type (ATM / cash back)
- Filtering by cash back location type (grocery, etc.)
- Filtering by institution (B of A, Wachovia, etc.)
- Details for a specific location
- Directions to a specific location
- Feedback mechanism to report inaccurate data
- Google Maps core functionality
- Google's advanced geo-coding capabilities
- Ad space for cross-selling

MOBILE BROWSER

- All core features of desktop browser version
- The following features may potentially be omitted due to screen size:
 - Feedback mechanism
 - Filtering certain attributes

IPHONE & ANDROID SPECIFIC

- All core features of desktop browser version
- GPS functionality
- Compass functionality
- Tap to call

MARKETING FEATURES

- Test&Target to optimize within apps
- Advanced targeting and dynamic ads
 - Based on: Location, device, filters applied, repeat user
